OBJECTIVE(S)

To keep field seeded to CP42.

Crop

Tract: 905

Access Control

Excluding livestock from an area not intended for grazing and excluding the area from mechanical harvest of forages. To protect, maintain, or improve the quantity and quality of the plant and animal resources; to maintain enough cover to protect the soil; to maintain moisture resources; and to increase natural beauty.

Total:	23.63 ac				

Conservation Cover

Establishing and maintaining perennial vegetative cover on the land that has been temporarily removed from production of agricultural commodities. This practice may be applied as part of a system to accomplish one or more of the following purposes: (1) To reduce soil erosion and sedimentation. (2) To improve water quality. (3) To create or enhance wildlife habitat. See IA-CPA-4 or other approved documentation sheet for seeding details.

Herbaceous Weed Control

Remove or control of herbaceous weeds including invasive, noxious or prohibited plants in order to maintain the quality of the planned CRP cover. Control infestations of weeds, insects and other pests by mowing, spraying, burning or other acceptable means on areas enrolled into CRP. All noxious weeds must be controlled. All volunteer trees and woody plants must be controlled. Nurse crops such as oats must be mowed or clipped prior to seed maturity. During years 1 and 2 of the contract, CRP areas may be mowed or sprayed as needed to control weeds (if spraying, be sure to follow all label directions). Usually at least 3-4 mowing operations are needed the first year (seeding year) and at least 1-2 mowing operations are needed the second contract year. If Prescribed Burning is used as a control measure, Prescribed Burning will be completed on the same land no more than once every 5 to 7 years, unless planned more frequently by NRCS to address a unique problem. Starting in year 3, no mowing, spraying, or burning may be done during the primary nesting season (May 15 through August 1), unless permission is granted by the FSA County Committee prior to mowing, spraying or burning. Mowing for cosmetic purposes is not allowed at any time. Contact your local FSA office for details. Operation and Maintenance: Following initial treatment, some regrowth, resprouting, or reoccurrence of herbaceous weeds may be expected. Spot treatment of individual plants or areas needing re-treatment should be completed as needed when weed vegetation is most vulnerable to desired treatment procedures. Review and update the pest management plan periodically in order to incorporate new IPM technology and complex weed population changes; and avoid the development of weed resistance to herbicide chemicals.

Upland Wildlife Habitat Management

Creating, maintaining, or enhancing areas, for food and cover for upland wildlife. To create, maintain, or enhance habitat suitable for sustaining desired kinds of wildlife. Mid-Contract Management job sheet provides options available for required mid-contract management activities. Mid-Contract activities will be scheduled in the CRP Plan according to the Mid-Contract Management job sheet. Mid-Contract activities are not to be completed during the primary nesting season (May 15 - August 1). For specific practices, Food Plots may be a part of the CRP contract. If Food Plots are to be included as part of the CRP contract, see attached Job Sheet for details. If the food plot is relocated, the producer is responsible for seeding the abandoned food plot area at his/her own expense to the approved permanent vegetative cover.

Upland Wildlife Habitat Management

IA-CRP-Pollinator: Plant Pollinator Habitat according to the CPA-4 or Pollinator Habitat Job sheet. Pollinator Habitat is to remain in the same location for the duration of the CRP contract. Show location on the plan map. Reseeding of the Pollinator Habitat may be required in order to maintain an adequate stand of desired plants. A Mid-Contract activity is required for the Pollinator Habitat. See the Mid-Contract Management job sheet for options. Food Plots are NOT allowed on areas established to Pollinator Habitat.
